

Crate Structure

Timer State Machine

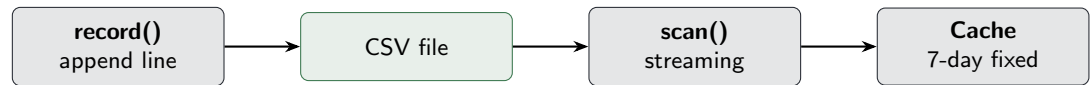

App → Shell Flow

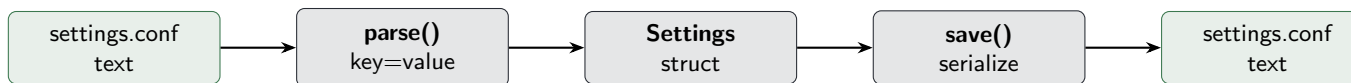

Flags consumed by shell each frame — no direct shell → core calls

Stats Pipeline

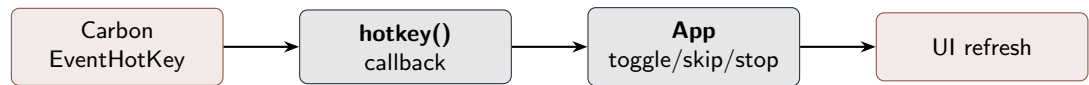

Entry = (epoch, seconds, activity, completed)
8KB chunk buffer, 256B line cap

Settings Pipeline

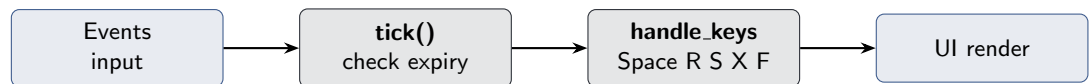

Atomic write: tmp → rename
Clamp: session 1–180, break 1–60, cycle 2–10

Hotkey Path (macOS)

Ctrl+Option: Space, R, S, X, T
No tap, no polling, no thread

Shell Dispatch (egui)

Native commands drained from queue
Menu bar, hotkeys, sleep/wake
